when bullets intersect with targets, triggering score updates

and removing objects from the scene. The game also includes a

scoring system that rewards accuracy and penalizes excessive shooting

and time taken, encouraging players to optimize their strategy.

<p>

Through this project, I gained experience with managing dynamic

object lists and implementing game logic that balances user input,

physics, and scoring systems. Arcade Shooter demonstrates my

ability to design interactive applications that combine real-time updates,

user control, and performance-based feedback.
